INTRODUCTION

Lavender + Rose

Who are we? We're Rosie and Jess, twin sisters living and working between London and Glasgow

What do we do? Our approach is simple, we want you to be happy. We like to think listening is our number one skill, after styling up your wedding that is.

From wild and wintry to sumptuous and summery, we are able to interpret your brief and deliver something truly beautiful whatever your budget. From full day floral and styling management to those teeny tiny details that make your wedding unique we'll always do our best to hit the nail on the head (and dare we say it, exceed expectations).

But do other people actually think you're good? We're glad you asked, we promise we didn't write this ourselves, or ask our mum to. You can find it on Google:

'One word - fantastic! Lavender and Rose provided everything we wanted... our wedding bouquets, button holes, a ceremony arch, bunting, centre piece wreaths and lots of lanterns!

During the 8 months of speaking to Rosie and Jess, they made the whole process so easy and stress free! Everything was delivered straight to our door or to the venue, with set up by the L&R team. On the day, all the decor surpassed our expectations and that is down to their hard work and attention to detail!

We definitely recommend!'

If we were a fancy corporate company we'd say that flowers were one of our two core pillars. We're not, so maybe we'll just say 'we're good at doing flowers, yes thank you for asking'. We like to create floral installations with a little bit of personality, exquisite bridal bouquets finished with hand dyed silk ribbons and those little unexpected touches - floral covered urinals anyone?

As far as possible we like to use British-grown blooms to help us be as sustainable as we can be. We don't do this at the detriment of your vision though, or the quality of output. In fact, we'd argue those little homegrown beauties are far superior to their global cousins. They're usually fragrant with perfume, come in gorgeous and more nuanced shades and have loads of movement through their different sizes and shapes.

We're as confident putting into practice a group of delicate jam jar posies as we are a hanging instal and welcome a challenge - so throw our way any big ideas you have and we'll do our best to deliver a pretty floral-filled solution.

A little something pretty

PROPS

Make your wedding p(r)op

We actually started out on this wedding journey with props as our main focus, Now, flowers are definitely as much of an equal part, but we have a major soft spot for all the little bits and pieces that mean our couples can customise.

We're naughty little magpies and pick up props wherever we are, with our candlesticks coming from vintage markets and our silverware making its way to us through the Glasgow auctions.

We often makes prop to spec. Some of our best work, in our humble opinion, has been bespoke. We've made copper pipe towers to frame romantic ceremonies and silk ribbon streamer poles to line a dreamy seaside aisle. If there's something in your mind that you can't seem to find anywhere, let us know so we can help bring your dream to life.

And then there's the 'popular crew', our props that get tracked down time and time again by cool couples. We're talking our brass candlesticks for a laid-back eclectic look, our log slices for DIY table centres and our hexagon lanterns to add a little romantic lighting.

Whether you're looking for a whole styling package or one little thing, let us know. We'd love to help.
